ABOUT SETS

Society for Electronic Transactions and Security (SETS) is an initiative of the Central Government through the Office of the Principal Scientific Adviser (PSA) to the Government of India. SETS was established for the purpose of nucleating, sensitising and developing technologies that can protect the information wealth of the country. Such an idea to form a specialized organisation in the area of information security was conceived by Dr. A.P.J. Abdul Kalam, formerly the Hon'ble President of India and was implemented by Dr. R.Chidambaram, PSA to the Government of India. SETS is the first organisation in India established in the Public-Private Partnership mode that is engaged in information security. SETS has its headquarter at Chennai close to IITM Research Park in Taramani. SETS is engaged in the research areas of hardware security, network security and cryptography. SETS has signed various MoUs with leading Institutions specializing in information security. SETS has initiated a programme with Institute of Mathematical Sciences (IMSc) to engage in research in Cryptanalysis.

THEME OF THE WORKSHOP

Our Web application security workshop is a 2-day hands-on, action packed course covering the common vulnerabilities that are leveraged by

attackers, the principles of securing Web applications, and general defense techniques to protect against future attacks. This workshop will help you understand the mechanics of the components necessary for effective Web application security which will then enable you to properly defend your organisation's assets. The objective is to create security awareness within the government, public, private, academic sector organisations and to educate them in the area of information security with the latest security threats, needs and development of techniques and tools in order to minimize security risk. The aim of this workshop is to demonstrate latest attacks on Web applications and countermeasures. The workshop will address the attack vectors, evolving advance attacks on Web applications, and defense techniques and mitigation strategies.

TARGET PARTICIPANTS

The course is targeted for CISOs / CIOs of Banks, Managers of IT Departments, Information Security Managers, Senior Faculty Members of Academic Institutions, Security Researchers will also be benefited by this workshop.

Delivering of the Lectures will be by specialists from SETS, Senior officials from IDRBT and domain experts from outside.

National Workshop on
"WEB APPLICATION SECURITY"
14th & 15th October 2011
