

Strategy and Synergy for Security

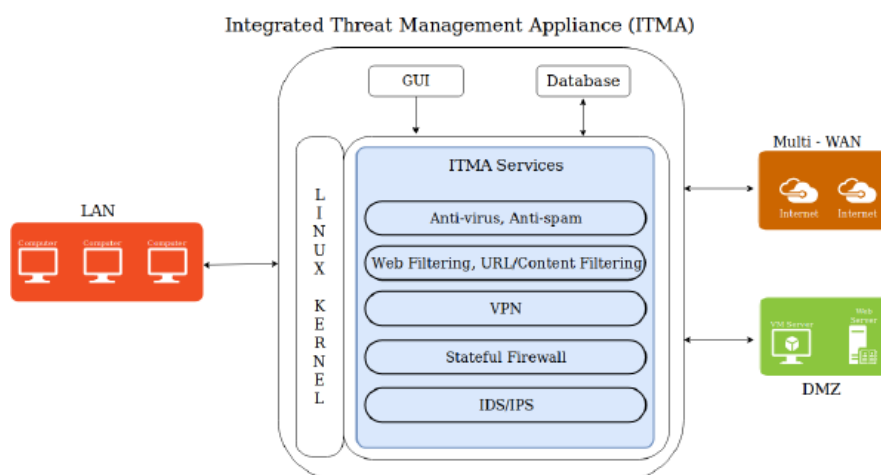

Electronics Corporation of India Limited

INTEGRATED THREAT MANAGEMENT APPLIANCE

Integrated Threat Management Appliance (ITMA) is an indigenous, comprehensive network perimeter security appliance aimed for real time protection of network infrastructures of government, education and other small/Medium Institutions. ITMA gateway ensures security from Internal and External threats such as unauthorized connections, intrusion, backdoor invaders, spam E-mails, virus attacks etc. ITMA is equipped with various threat detection and prevention capabilities under the administrative control. ITMA offers impressive throughput up to 10 Gbps.

FEATURES OF ITMA

- ✓ Firewall
- ✓ Web Proxy Security
- ✓ E-mail Security
- ✓ Intrusion Prevention System
- ✓ Gateway Antivirus
- ✓ DNS Security
- ✓ SSL VPN
- ✓ Deep Packet Inspection(DPI)
- ✓ Data Leakage Monitoring(DLM)

FIREWALL

- High performance firewall
- Static Routing, SNAT/DNAT
- Port Forwarding
- IPSET
- Simplified Firewall Rules Creation

E-MAIL SECURITY

- Integration with SpamAssassin
- Integration with In-built Gateway Antivirus
- Blacklist and Whitelist based Mail filtering

BACKUP AND RESTORE

- Automatic Backup of all configuration
- Restoration of previous state And default Factory settings

INTRUSION PREVENTION SYSTEM

- Custom Rule Support
- Default Signature Database with 30,000+ Signatures
- Logging/Alerting Capability

GATEWAY ANTIVIRUS

- Embedded Antivirus
- Blacklist/Whitelist file scanning
- Web content scanning
- Email content scanning

WEB PROXY SECURITY

- Block/Allow domains
- Manage users through proxy login
- In-built categories/blocklists
- Time Based Access/Block
- Block file extensions

DNS SECURITY

- Transparent DNS Proxy
- Static DNS support
- Supports custom upstream DNS Servers
- Blacklist and Whitelist based URL filtering
- Default Database with more than 2,30,000+ domains

VIRTUAL PRIVATE NETWORK

- Support both SSL and IPsec VPN
- Remote VPN service (Road Warrior)
- Site-to-Site VPN service
- Authentication : pre-shared key, X509 Certificate
- Encryption : AES-128/192/256-bits Blowfish-128/192/256-bits

DATA LEAKAGE MONITORING

- Scans files transferred within Or outside Network
- Supports over 50+ Filetypes
- Scans Web/Email Traffic
- Supports SSL Inspection
